^{*} Above prices and net asset value per unit are shown as ex-distribution.

Note:

- (1) Total return is the annualised return of the Fund for the respective financial period/years computed based on the net asset value per unit and net of all fees, annualised over one year.
- (2) Distribution yield is calculated based on the total distribution for the period dividend by the closing quoted price.
- (3) Management expense ration ("MER") is calculated based on the total fees and expenses incurred by the Fund divided by the average fund size calculated on a daily basis.

(4) Portfolio turnover ratio ("PTR") is computed based on the average of the total acquisitions and total disposals of investment securities of the Fund divided by the average fund size calculated on a daily basis. The PTR decreased by 0.27 times (81.8%) as compared to 0.33 times for the financial year ended 31 December 2010 mainly due to decrease in investing activities.

- (a) Independently verified by Perkasa Normandy Advisers Sdn Bhd.
- (b) IBoxx ABF Malaysia Index ("iBoxx Index") (source: www.indexco.com)

The Fund's performance is calculated based on net asset value per unit of the Fund. Average total returns ABF Malaysia Bond Index Fund ("ABFMYI") for a period is computed based on the absolute return for that period annualised over one year.

Note: Past performance is not necessarily indicative of future performance and that unit prices and investment returns may go down, as well as up.

Has the Fund achieved its objective?

For the financial period under review, the Fund has met its objective i.e passively managed against the given benchmark and the return corresponded closely to the performance of the benchmark index.

Fund Performance

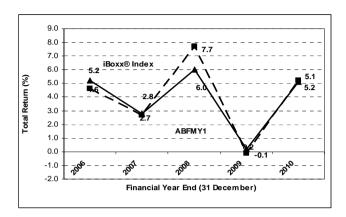

For the financial period under review, the Fund recorded a return of 3.68%.

Thus, the Fund's return of 3.68% has underperformed the benchmark return of 3.93% by 0.25%.

The NAV of the Fund decreased by 0.07% from RM584,921,826 to RM584,536,419. The NAV per unit of the Fund decreased by 0.06% from RMI.0884 to RMI.0877, while units in circulation remain unchanged at 537,421,800 units during this financial period.

The closing price of the Fund quoted on Bursa Malaysia decreased by 1.66% from RMI.0870 to RMI.0690.

The line chart below shows comparison between the annual performances of ABFMYI and iBoxx® Index for each of the financial years ended 31 December.

Past performance is not an indication of the future performance of the Fund.

Strategies and Policies **Employed**

For the financial period under review, the Fund used a passive strategy whereby the Manager aims, by way of representative sampling, to achieve a return on the Fund assets that closely tracks the returns of the benchmark index.

Portfolio Structure

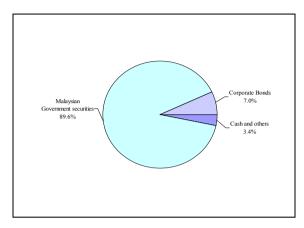

This table below is the asset allocation of the Fund for the financial period under review.

	30-6-2011	31-12-2010	Changes
	%	%	(%)
Malaysian Government securities	89.6	91.9	-2.3
Quasi-Government bonds	7.0	7.0	-
Cash and others	3.4	1.1	2.3
Total	100.0	100.0	

During the financial period under review, the Fund's cash holdings increased from 1.1% to 3.4% as at 30 June 2011. Holdings in Quasi-Government bonds remained at 7.0%. The Fund's holdings of Malaysian Government securities ("MGS") decreased from 91.9% to 89.6% for the financial period under review.

(forward)

This pie chart below shows the sectoral composition of the Fund for the financial period under review.

Distribution/ unit splits

During the financial period under review, the Fund declared an income distribution of 2.00 sen per unit on 14 January 2011, detailed as follows:

2.00 sen per unit final income distribution*	Change in the unit price prior and subsequent to the final income distribution	Before income distribution on 14 January 2011 (RM)	After income distribution on 14 January 2011 (RM)
	Net asset value per unit	1.0875	1.0675

Subsequent to the financial period under review, the Fund declared an income distribution of 1.75 sen per unit on 15 July 2011, detailed as follows:

1.75 sen per	Change in the unit	Before income	After income
unit interim	price prior and	distribution on	distribution on
income	subsequent to the	15 July 2011	15 July 2011
distribution	interim distribution	(RM)	(RM)
	Net asset value per unit	1.0913	1.0738

^{*} Final income distribution for the financial year ended 31 December 2010.

There were no unit split made for the financial period under review.

State of **Affairs**

There has been neither significant change to the state of affairs of the Fund nor any circumstances that materially affect any interests of the unit holders during the financial period under review.

Rebates and Soft Commission

It is our policy to pay all rebates to the Fund. However, soft commissions received for goods and services such as fundamental database, financial wire services, technical analysis software and stock quotation system incidental to investment management of the Fund are retained by the Manager. For the financial period under review, the Manager has received soft-commissions.

Market Review

In the month of January across the benchmark tenures the 3 yr, 5 yr and 10 yr MGS ended the month mixed compared to the previous month at 3.30%, 3.44% and 4.01% respectively. The MGS yield curve flattened in January as long tenured yield declined. Trading volume was heavy at RM12.4 billion versus RM7.9 billion in the previous month. Selling momentum was strong at the beginning of the month as supply concerns lingered. Investors eagerly waited for the first MGS tender announcement. Following the tender, we saw MGS buying gradually emerge.

The first auction of the year 10.5-year MGS 7/21 was issued at RM3.5 billion which is within our estimate. The tender attracted moderate demand with a 2.3 times bid-tocover ratio compared with an average of 2.5 times in all the 10-year auctions in 2010. MGS 7/21 drew an average yield of 4.16% with a high at 4.17% and a low at 4.148%. However, private placement of the MGS was RM3.0 billion against our estimate at RM2.0 billion. Foreign holdings in fixed income instruments fell to RM118.6 billion as at end November 2010, from a high of RMI27.0 billion as of end October 2010, marking the first drop after rising for nine months consecutively.

The corporate bond market saw lighter trading in January as monthly traded volume fell 46% compared to the previous month, with RM3.204 billion done. Trading interest continued to cluster at AAA and AA due to better liquidity in those segments. Credit spreads widened.

The primary market was more active, with a number of securities issued or sealed for an amount of RM4.64 billion. Bulk of the new issuances concentrated on GG and AAA-rated bonds. Among them were PAAB RM2.7 billion (GG), Aman Sukuk RM1.1 billion (AAA), Padiberas RM350.0 million (AA3), Sabah Development Bank RM340.0 million (AAI), and Naim Holdings RMI50.0 million (AA3). Demand for the bonds was strong. As a result, PAAB was upsized from RM2.5 billion, Sabah Development Bank was upsized from RM300.0 million and Aman sukuk was upsized from RM1.0 billion.

In the month of February across the benchmark tenures the 3 yr, 5 yr and 10 yr MGS ended the month mixed compared to the previous month at 3.38%, 3.39% and 4.08% respectively. The new 3-year MGS benchmark was actively traded in the secondary market. Despite the surge in global crude oil prices at month-end and the higher CPI print, yields held steady as investors sought safety in the MGS market amidst the unrest in the Middle Fast and North Africa.

There were two new auctions and one private placement in February. The RM4.5 bn 3.5-year MGS saw a healthy bid-to-cover of 2.19 times with an average yield of 3.434% (low of 3.420% and high of 3.440%) while the RM3.5 bn 7.5-year GII saw a firm bid-tocover of 2.42 times with an average yield of 3.872% (low of 3.857% and high of 3.878%). The 7.5-year GII that was privately placed had a size of RM2.5 bn.

The Corporate Bond market saw lighter trading in February as monthly traded volume fell 14% compared to the previous month, with RM6.2 bn done. Trading interest continued to cluster at AAA and AA due to better liquidity in those segments. Spreads tightened compared to the previous month-end, particularly in the shorter end.

The primary market saw some highly-rated and government-guaranteed issuances. Namely, Govco Holdings Berhad (government-guaranteed) and Gulf Investment Corp. which launched a 5-year RM600 mn Sukuk offering, which was given a AAA rating by RAM Ratings.

In the month of March across the benchmark tenures the 3 year, 5 year, 7 year and 10 year MGS yields ended the month higher compared to the previous month at 3.39%, 3.62%, 3.91% and 4.11% respectively. The MGS yield curve bearish steepened. The benchmarks were actively traded in the secondary market with volume of RM87.4 billion during the month. Gains from the Japan earthquake disaster were temporary and subsequently reversed as the market began to stabilize and paid attention to rate tightening in several countries to combat inflationary threats.

There were two new auctions in March being MGS 9/16 (5.5 years) and 9/14 (3.5 years). The reopening of RM4.0 billion 5.5-year MGS saw a healthy bid-to-cover of 2.24 times with an average yield of 3.567% (low of 3.550% and high of 3.575%) while the new RM4.0 billion 3.5-year MGS saw a weak bid-to-cover of 1.433 times with an average yield of 3.505% (low of 3.49% and high of 3.52%).

The Corporate Bond market saw stronger trading activities in March with monthly traded volume increased 16% to RM7.2 billion compared to the previous month. Trading interest continued to cluster at AAA and AA due to better liquidity in those segments. Credit spreads widened compared to the previous month, particularly in the shorter to medium end of the tenors.

The primary market saw a small issuance volume compared to the previous month, notably Maybank Islamic (AAI) RMI.0 billion. KrisAssets Holdings (not rated) RM300.0 million, KNM Capital (AA3) RM40.0 million and Boustead Holdings (AAA Danajamin Guaranteed) RM91.0 million.

In the month of April across the benchmark tenures the 3 year, 5 year, 7 year and 10 year MGS yields ended the month lower compared to the previous month at 3.29%. 3.55%, 3.72% and 3.97% respectively. The MGS yield curve bull flattened. The belowconsensus CPI figure and strong demand for the 10-year GII auction led to net buying interest while the strengthening of the Ringgit to below USD/MYR 3.000 lent support to the shorter tenors as they attracted foreign interest.

There were two new auctions in April. The RM3 bn 15-year MGS saw a healthy bidto-cover of 2.3 times with an average yield of 4.392% (low of 4.372% and high of 4.400%) while the RM3.5 bn 10-year GII saw a strong bid-to-cover of 3.03 times with an average yield of 4.170% (low of 4.157% and high of 4.175%).

The Corporate Bond market saw lighter trading as monthly traded volume fell 10% compared to the previous month, with RM6.4 bn done. Trading interest continued to cluster at AAA and AA due to better liquidity in those segments. Spreads widened compared to the previous month-end due to the firmer MGS market. Notable primary issuances were Alliance Bank's Subordinated Debt and Westports' Islamic MTN. Telekom Malaysia Bhd (TM") also launched a RM2 bn Islamic CP/MTN programme to meet its capital expenditure requirements. During the month, TM made its first issuance of RMI50 mn Islamic CPs pursuant to the programme.

In May, across the benchmark tenures the 3 year, 5 year, 7 year and 10 year, MGS yields ended the month mixed compared to the previous month at 3.31%, 3.52, 3.92% and 4.02% respectively.

There were two auctions in May. The RM3.5 billion 7-year MGS saw a bid-to-cover of 1.64 times with an average yield of 3.747% (low of 3.730% and high of 3.755%) while the RM4.0 billion 5.5-year GII saw a bid-to-cover of 1.91 times with an average yield of 3.710% (low of 3.690% and high of 3.719%).

In June, across the benchmark tenures the 3 year, 5 year, 7 year and 10 year, MGS yields ended the month lower compared to the previous month at 3.24%, 3.51%, 3.72% and 3.93% respectively. The longer end received a boost from the smaller than expected issue size of the new 20-year MGS of RM2 bn versus expectations of RM4 bn. The MGS yield curve moved down as soft economic numbers and concerns over Greece's debt crisis led to save haven flows. However, at month end the market weakened slightly after US Treasury yields rose on the back of a poor 7 year US Treasury auction as well as the passage of Greece's austerity budget bill vote.

There were two auctions in June. The reopening of the RM4 bn 10-year MGS saw a healthy bid-to-cover of 2.3 times with an average yield of 3.970% (low of 3.959% and high of 3.977%) while the new RM2 bn 20-year MGS also saw good demand with a bid-to-cover of 2.5 times and an average yield of 4.232% (low of 4.205% and high of 4.250%).

Malaysia sold USD1.2 bn 5 year Sukuk at CT+145 bps and USD800 mn 10 year Sukuk at CT+165 bps. The proceeds will be used to redeem the country's USD1.75 bn bond maturing on 15 July 2011. The issuance attracted USD9 bn of orders from investors in Europe, Asia, the Middle East and the United States.

Market Outlook

The tone for the MGS market over the coming weeks is likely to be set by this play of factors:

- Changing supply/demand dynamics in 2H2011 the limited MGS/GII issuance on the longer end in the 2H2011 compared to the 1H2011 suggests limited volumes of long dated papers
- Large amount of MGS maturities in 3Q2011 suggests opportunities to pick up bonds
- Quantum of pre-emptive monetary policy tightening- now that BNM has adopted a pause mode market would be gyrating to a new equilibrium on the back of expectations of a September hike - IRS curve which was low following the rally in June weakened further after the pause stance of BNM
- Prospects of further gains in MYR over the near and medium term underpinned by expectations of Asian currency appreciation
- US Treasury movements, especially, the end of QE2 on June 30th 2011 which has resulted in 10yr yields moving higher and the resulting debate on growth/inflation dynamics - a major variable influencing inflows/outflows into EM debt markets as well as AXI currency appreciation
- Developments in the European sovereign space which triggered safe haven flows to USTs and pressured both MYR IRS and MGS yields lower in June

As we write, the flattening bias of the yield curve which materialized last month is likely to continue. Tactically we are inclined towards a neutral view from the positive view, held earlier on account of valuations which are looking unattractive at this very juncture. We intend to re-enter the MGS market when valuations look more compellingly attractive.

That being said we also remain vigilant of the substantial offshore positioning in MGS which carries the risk of sharp and swift reversal in the event of MYR weakness or acceleration of inflationary pressures. Note much of flows have been biased to short dated papers (60% foreign ownership of BNM bills) indicating an inclination to position for carry and FX gains.

Kuala Lumpur, Malaysia AmInvestment Services Berhad

29 July 2011

Additional Information

Board of Directors of the Manager

The Board of Directors, of which one-third are independent members, exercise ultimate control over the operations of the Company. For the financial period under review from 1 January 2011 to 30 June 2011, there were two (2) Board of Directors' Meetings held by the Manager.

Details of the Directors of the Manager are set out as below:

Name	:	Harinder Pal Singh
Age	Ė	49
Nationality	:	Malaysian
Qualification	:	Bachelors Degree in Accounting, University Malaya

Material Litigation

For the financial period under review, neither the directors of the management company nor the Manager of the Fund were engaged in any material litigation and arbitration, including those pending or threatened, and any facts likely to give any proceedings, which might materially affect the business/financial position of the Manager and of its delegates. The Fund also is not engaged in any material litigation and arbitration, including those pending or threatened, and any facts likely to give any proceedings, which might materially affect the Fund.

Investment Manager

We have appointed AmInvestment Management Sdn Bhd, a licensed fund manager approved by the Securities Commission on 4 March 1997, to implement the Fund's investment strategy on behalf of us to achieve the objectives of the Fund. AmInvestment Management Sdn Bhd, a wholly owned subsidiary of AmInvestment Group Berhad, has been in the fund management industry since 1982.

Investment Committee

The Committee reviews the Fund's investment objective and guidelines, and to ensure that the Fund is invested appropriately. For the financial period under review, there were 6 Investment Committee Meetings held by the Manager.

otes to the Financial Statements

L. GENERAL INFORMATION

ABF Malaysia Bond Index Fund ("the Fund") was established pursuant to a Deed dated 12 July 2005 as amended by Deeds Supplemental thereto ("the Deed"), between Amlnvestment Services Berhad as the Manager, HSBC (Malaysia) Trustee Berhad as the Trustee and all unitholders.

The Fund was set up with the objective for investors who seek an "index-based" approach to investing in a portfolio of Ringgit Malaysia denominated Government and quasi-Government debt securities. As provided in the Deeds, the "accrual period" or financial year shall end on 31 December and the units in the Fund were first offered for sale on 13 July 2005.

2. BASIS OF PREPARATION OF FINANCIAL STATEMENTS

The financial statements have been prepared in accordance with applicable Financial Reporting Standards ("FRS").

Changes in Accounting Policies

The accounting policies adopted are consistent with those of the previous financial year, except for the adoption of new and revised FRSs and IC Interpretations which are effective for financial year beginning on or after I July 2009, I January 2010 or I March 2010. Except as discussed below, these new and revised FRSs and IC Interpretations do not give rise to any significant effects on the financial statements of the Fund.

FRS 7 Financial Instruments: Disclosures

Prior to I January 2010, information about financial instruments was disclosed in accordance with the requirements of FRS 132 Financial Instruments: Disclosure and Presentation. FRS 7 introduces new disclosures to improve the information about financial instruments. It requires the disclosure of qualitative and quantitative information about exposure to risks arising from financial instruments, including specified minimum disclosures about market risk, credit risk and liquidity risk, including VaR analyses to market risk.

The Fund has applied FRS 7 prospectively in accordance with the transitional provisions. Hence, the new disclosures have not been applied to the comparatives. The new disclosures are included throughout the financial statements for the period as at 30 June 2011.

FRS 8 Operating Segments

FRS 8, which replaces FRS 114 Segment Reporting, requires disclosure of information about the Fund's operating segments, based on information about the components of the entity that is available to the chief operating decision maker for the purposes of allocating resources to the segments and assessing their performance, and replaces the requirement of the Fund to determine primary (business) and secondary (geographical) reporting segments. For management purposes, the Fund only has one reporting segment as disclosed in Note 16.

FRS 101 Presentation of Financial Statements (Revised)

The revised FRS 101 introduces changes in the presentation and disclosures of financial statements. The revised standard separates owner and non-owner changes in equity. The statement of changes in equity includes only details of transactions with owners, with all non-owner changes in equity presented as a single line. The standard also introduces the statement of comprehensive income, with all items of income and expense recognised in profit or loss, together with all other items of income and expense recognised directly in equity, either in one single statement, or in two linked statements. The Fund has elected to present this statement as one single statement.

In addition, a statement of financial position is required at the beginning of the earliest comparative period following a change in accounting policy, the correction of an error or the classification of items in the financial statements.

The revised FRS 101 also requires the Fund to make new disclosures to enable users of financial statements to evaluate the Fund's objectives, policies and processes for managing capital (Note 20).

The revised FRS 101 was adopted retrospectively by the Fund.

Amendments to FRS 132 Financial Instruments: Presentation and FRS 101 Presentation of Financial Statements – Puttable Financial Instruments and Obligations Arising on Liquidation

Amendments to FRS 132 and FRS 101 became effective for annual periods beginning on or after 1 January 2010. The amendment to FRS 132 requires entities to classify puttable financial instruments as equity if the instruments have certain particular features and meet specific conditions. The amendments to FRS 101 require disclosure of certain information relating to puttable instruments classified as equity.

The unitholders' capital has the features and meets the conditions for classification as equity instruments. Consequently, upon adoption of the Amendments to FRS 132, unitholders' capital amounting to RM563,972,881 (31 December 2010: RM563,972,881) is reclassified from financial liabilities to equity. Distributions made by the Fund are recognised as dividends in equity in the period in which they are declared.

FRS 139 Financial Instruments: Recognition and Measurement

FRS 139 establishes principles for recognising and measuring financial assets, financial liabilities and some contracts to buy and sell non-financial items. The Fund has adopted FRS 139 prospectively on 1 January 2010 in accordance with the transitional provisions.

The effects arising from the adoption of this standard has been accounted for by adjusting the opening balance of reserves as at I January 2010. Comparatives are not restated. The details of the changes in accounting policies and the effects arising from the adoption of FRS 139 are discussed below:

Fixed income securities investment schemes

Prior to I January 2010, the Fund's investments in fixed income securities were carried at indicative prices quoted by International Index Company Limited through iBoxx as at the reporting date. The fair value adjustments on the investments were recognised in profit or loss.

Upon the adoption of FRS 139, these investments are classified on 1 January 2010 as financial instruments at FVTPL and are stated at their respective fair values. The determination of fair values of the various types of financial instruments is as described in Note 18(b). The classification of these investments as financial instruments at FVTPL did not materially affect the financial statements of the Fund.

The Fund has not adopted the following FRSs, amendments to FRSs, Interpretation of the Issues Committee ("IC Interpretations") and Technical Releases ("TR") which have effective date as follows:

Effective for financial periods beginning on or after

FRS I	First-time Adoption of Financial Reporting Standards	I July 2010
FRS 3	Business Combinations (revised)	I July 2010
FRS 124	Related Party Disclosure	I January 2012
FRS 127	Consolidated and Separate Financial Statements	I July 2010
Amendments to FRS I	First-time Adoption of Financial Reporting Standards	l January 2011
Amendments to FRS I	Limited Exemption from Comparative FRS 7 Disclosures for First-time Adopters	I January 2011
Amendments to FRS I	Additional Exemption for First-time Adopters	I January 2011
Amendments to FRS 2	Share-based Payment	I July 2010
Amendments to FRS 2	Group Cash-settled Share-based Payment Transactions	I January 2011
Amendments to FRS 3	Business Combinations	l January 2011
Amendments to FRS 5	Non-current Assets Held for Sale and Discontinued Operations	I July 2010
Amendments to FRS 7	Financial Instruments: Disclosures	I January 2011
Amendments to FRS 7	Improving Disclosures about Financial Instruments	l January 2011
Amendments to FRS 101	Presentation of Financial Statements	I January 2011
Amendments to FRS 121	The Effects of Changes in Foreign Exchange Rate	I January 2011
Amendments to FRS 128	Investments in Associates	I January 2011
Amendments to FRS 131	Interests in Joint Ventures	I January 2011
Amendments to FRS 132	Financial Instruments: Presentation	I January 2011
Amendments to FRS 134	Interim Financial Reporting	l January 2011
Amendments to FRS 138	Intangible Assets	I July 2010
Amendments to FRS 139	Financial Instruments: Recognition and Measurement	I January 2011
IC Interpretation 4	Determining whether an Arrangement Contains a Lease	I January 2011
IC Interpretation 12	Service Concession Arrangements	I July 2010
IC Interpretation 15	Agreements for the Construction of Real Estate	l January 2012
(Forward)		

Effective for financial periods beginning on or after

IC Interpretation 16	Hedges of a Net Investment in a Foreign Operation	I July 2010
IC Interpretation 17	Distributions of Non-cash Assets to Owners	I July 2010
IC Interpretation 18	Transfer of Assets from Customers	l January 2011
IC Interpretation 19	Extinguishing Financial Liabilities with Equity Instruments	I July 2011
Amendments to IC Interpretation 9	Reassessment of Embedded Derivatives	I July 2010
Amendments to IC Interpretation 13	Customer Loyalty Programmes	I January 2011
Amendments to IC Interpretation 14	Prepayment of a Minimum Funding Requirements	I July 2011
TR 3	Guidance on disclosures of Transition to IFRSs	I January 2011
TR i-4	Shariah-Compliant Sale Contracts	l January 2011

Other than Amendments to FRS 7, the other FRSs, amendments to FRSs, IC Interpretations and TR are either not applicable or are expected not to have any significant impact on the financial statements of the Fund upon their initial application.

3. SIGNIFICANT ACCOUNTING POLICIES

Income Recognition

Income is recognised to the extent that it is probable that the economic benefits will flow to the Fund and the income can be reliably measured. Income is measured at the fair value of consideration received or receivable.

Dividend/distribution income is recognised when the Fund's right to receive payment is established. Interest on fixed income securities and short-term deposits, if any, is recognised on an accrual basis using the effective interest method.

Income Tax Expense

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date.

Current taxes are recognised in profit or loss except to the extent that the tax relates to items recognised outside profit or loss, either in other comprehensive income or directly in equity.

Functional and Presentation Currency

Functional currency is the currency of the primary economic environment in which the Fund operates that most faithfully represents the economic effects of the underlying transactions. This is the Ringgit Malaysia which reflects the currency of the economy in which the Fund competes for funds, issues and redeems units. The Fund has also adopted Ringgit Malaysia as its presentation currency.

Statement of Cash Flows

The Fund adopts the direct method in the preparation of the statement of cash flows.

Cash equivalents are short term, highly liquid investments that are readily convertible to cash with insignificant risk of changes in value.

Distribution

Distributions are at the discretion of the Fund. A distribution to the Fund's unitholders is accounted for as a deduction from realised reserve except where distribution is sourced out of distribution equalisation which is accounted for as a deduction from unitholders' capital. A proposed distribution is recognised as a liability in the period in which it is approved.

Unitholders' Capital

The unitholders' capital of the Fund meets the definition of puttable instruments classified as equity instruments under the revised FRS 132.

Distribution Equalisation

Distribution equalisation represents the average distributable amount included in the creation and cancellation prices of units. This amount is either refunded to unitholders by way of distribution and/or adjusted accordingly when units are cancelled.

Financial Assets

Financial assets are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

When financial assets are recognised initially, they are measured at fair value, plus, in the case of financial assets not at fair value through profit or loss, directly attributable transaction costs.

The Fund determines the classification of its financial assets at initial recognition, and the categories applicable to the Fund include as financial assets at fair value through profit or loss and loans and receivables.

Financial assets at FVTPI

Financial assets are classified as financial assets at FVTPL if they are held for trading or are designated as such upon initial recognition. Financial assets held for trading include fixed income securities acquired principally for the purpose of selling in the near term.

Subsequent to initial recognition, financial assets at FVTPL are measured at fair value. Changes in the fair value of those financial instruments are recorded in 'Net gain or loss on financial assets at fair value through profit or loss'. Interest earned and dividend revenue elements of such instruments, if any, are recorded separately in 'Interest income' and 'Gross dividend income', respectively. Exchange differences on financial assets at FVTPL are not recognised separately in profit or loss but are included in net gains or net losses on changes in fair value of financial assets at FVTPL.

Investments are stated at fair value on a portfolio basis in accordance with the provisions of the Deed, fair value is determined based on prices provided by the index provider, International Index Company Limited ("IIC"), plus accrued interest. Adjusted cost of investments relates to the purchase cost plus accrued interest, adjusted for amortisation of premium and accretion of discount, if any, calculated on the effective interest rate method over the period from the date of acquisition to the date of maturity of the respective securities as approved by the Manager and the Trustee. Unrealised gains or a loss recognised in the statement of comprehensive income is not distributable in nature.

On disposal of investments, the net realised gain or loss on disposal is measured as the difference between the net disposal proceeds and the carrying amount of the investments. The net realised gain or loss is recognised in the statement of comprehensive income.

Loans and receivables

Financial assets with fixed or determinable payments that are not quoted in an active market are classified as loans and receivables. The Fund includes short term receivables in this classification

Subsequent to initial recognition, loans and receivables are measured at amortised cost using the effective interest rate method. Gains and losses are recognised in profit or loss when the loans and receivables are derecognised or impaired, and through the amortisation process.

Financial Liabilities

Financial liabilities are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability.

The Fund's financial liabilities which include amount due to Trustee, amount due to Manager, amount due to index provider and sundry payables are recognised initially at fair value plus directly attributable transaction costs and subsequently measured at amortised cost using the effective interest rate method.

The Fund's financial liabilities which include amount due to Manager and Trustee, amount due to Index Provider and sundry payables are recognised initially at fair value plus directly attributable transaction costs and subsequently measured at amortised cost using the straight line method.

A financial liability is derecognised when the obligation under the liability is extinguished. Gains and losses are recognised in profit or loss when the liabilities are derecognised, and through the amortisation process.

Classification of Realised and Unrealised Gains and Losses

Unrealised gains and losses comprise changes in the fair value of financial instruments for the period and from reversal of prior period's unrealised gains and losses for financial instruments which were realised (i.e. sold, redeemed or matured) during the reporting period.

Realised gains and losses on disposals of financial instruments classified as part of 'at fair value through profit or loss' are calculated using weighted average method. They represent the difference between an instrument's initial carrying amount and disposal amount

Significant Accounting Estimates and Judgments

The preparation of the Fund's financial statements requires the Manager to make judgments. estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability in the future.

The Fund classifies its investments as financial assets at FVTPL as the Fund is an open- ended fund that may sell its investments for short-term profit-taking or to meet unitholders cancellation.

No other major judgments have been made by the Manager in applying the Fund's accounting policies. There are no key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within next year.

4. **INVESTMENTS**

	30-6-2011 Financial assets at FVTPL	31-12-2010 Financial assets at FVTPL	31-12-2009*
	RM	RM	RM
At nominal value:			
Quasi-Government bonds	40,000,000	40,000,000	60,000,000

6. AMOUNT DUE TO INDEX PROVIDER

Included in amount due to index provider is the license fee payable to International Index Company Limited, the provider of the benchmark index.

License fee is calculated on a daily basis at the following rate:

% p.a.

Fund Size

From I July 2008 onwards

0.0175
0.01
No charge

subject to a minimum annual fee of USD21,234

7. AMOUNT DUE TO MANAGER

Amount due to Manager represents the manager's fee payable.

Manager's fee was charged at a rate of 0.10% per annum on the net asset value of the Fund, calculated on a daily basis, for the financial period from I January 2011 to 30 June 2011 (0.10% in 2010).

The normal credit period for Manager's fee payable is one month.

^{*} Initial Funding for the Fund was USD I 15,400,000

8. AMOUNT DUE TO TRUSTEE

Amount due to Trustee represents the trustee's fee payable.

Trustee's fee was charged at a rate of 0.07% per annum on the net asset value of the Fund, calculated on a daily basis, for the financial period from 1 January 2011 to 30 June 2011 (0.07% in 2010).

The normal credit period for Trustee's fee payable is one month.

NET GAIN FROM INVESTMENT - FVTPL

	30-6-2011 RM	31-12-2010 RM
Financial assets at FVTPL comprises the following: Net unrealised (loss)/gain on changes in value of		
investments	(370,085)	5,857,894
Net realised gain on sale of investments	583,835	1,309,720
	213,750	7,167,614

10. TOTAL EQUITY

Net asset value attributable to unitholders is represented by:

		30-6-2011	31-12-2010	31-12-2009 (Restated)

П **UNITS HELD BY RELATED PARTIES**

	30-6-2011		31-12-2010	
	Number of units	RM	Number of units F	
Parties related to the Manager*	60,141,530	64,291,296	69,129,430	75,143,690

^{*} The parties related to the Manager are the legal and beneficial owners of the units.

The Manager, AmInvestment Services Berhad, did not hold any unit in the Fund as at 30 June 2011 and 31 December 2010.

12. INCOME TAX EXPENSE

Income tax payable is calculated on investment income less deduction for permitted expenses as provided for under Section 63B of the Income Tax Act, 1967.

Pursuant to Schedule 6 paragraph 35 of the Income Tax Act, 1967, interest income on shortterm deposit with licensed financial institutions derived by the Fund is exempted from tax.

A reconciliation of income tax expenses applicable to net income before tax at the statutory income tax rate to income tax expenses at the effective income tax rate of the Fund is as follows:

	I-I-2011 to 30-6-2011 RM	I-I-2010 to 30-6-2010 RM
Net income before income tax	10,363,030	15,102,699
Taxation at Malaysian statutory rate of 25% Tax effects of:	2,590,700	3,775,700
Income not subject to tax	(2,727,100)	(3,903,700)
Permitted expenses not deductible for tax purposes Restriction on tax deductible expenses for unit trust	77,300	59,900
funds	51,800	61,500
Permitted expenses not used and not available for future years	7,300	6,600
Tax expense for the financial period		

13. DISTRIBUTIONS

Distributions to Unitholders declared on 14 January 2011 (declared on 11 January 2010 and 16 June 2010 for the previous financial period) are from the following sources:

	I-I-2011 to 30-6-2011 RM	I-I-2010 to 30-6-2010 RM
Interest income Undistributed net income brought forward – realised Net realised gain on sale of investments	4,262,632 6,769,736 261,378	6,800,383 11,709,530 556,055
Less: Expenses	11,293,746 (545,310)	19,065,968 (511,979)
Total amount of distribution	10,748,436	18,553,989
Net/gross distribution per unit (sen)	2.00	3.85
Distribution made out of: - Realised reserve [Note10 (b)]	10,748,436	18,553,989
Comprising: Cash distributions	10,748,436	18,553,989

Included in the income distribution for the financial period from I January 2011 to 30 June 2011 was an amount distributed from the previous financial year's realised income of RM6,769,736 (RM11,709,530 for the financial period from 1 January 2010 to 30 June 2010).

14. MANAGEMENT EXPENSE RATIO ("MER")

The Fund's MFR is as follows:

	I-I-2011 to 30-6-2011 % p.a.	1-1-2010 to 30-6-2010 % p.a.
Manager's fee	0.10	0.10
Trustee's fee	0.07	0.07
License fee	0.01	0.02
Trust administrative expenses	0.01	0.01
Total MER	0.19	0.20

The MER of the Fund is the ratio of the sum of annualised fees and expenses incurred by the Fund to the average NAV of the Fund calculated on a daily basis.

15. PORTFOLIO TURNOVER RATIO ("PTR")

The portfolio turnover ratio, calculated by dividing the average of total acquisitions and total disposals of investment securities by the average net asset value of the Fund calculated on a daily basis, is 0.06 times for the financial period from 1 January 2011 to 30 June 2011 (0.18 for the financial period from 1 January 2010 to 30 June 2010).

16. SEGMENTAL REPORTING

In accordance with the objective of the Fund, substantially all of the Fund's investments are made in the form of fixed income securities in Malaysia. The Manager is of the opinion that the risk and rewards from these investments are not individually or segmentally distinct and hence the Fund does not have a separate identifiable business or geographical segments.

17. TRANSACTIONS WITH FINANCIAL INSTITUTIONS

Details of transactions with financial institutions for the financial period from I January 2011 to 30 June 2011 are as follows:

Financial institutions	Transaction value		
	RM	%	
CIMB Bank Berhad	35,856,973	51.35	
AmBank (M) Berhad*	25,266,203	36.18	
Malayan Banking Berhad	5,323,179	7.62	
OCBC Bank (Malaysia) Berhad	3,383,840	4.85	
Total	69,830,195	100.00	

^{*} A financial institution related to the Manager. The Manager and the Trustee are of the opinion that the above transactions have been entered in the normal course of business and have been established under terms that no less favourable than those arranged with independent third parties.

The above transaction values are in respect of local fixed income instruments. Transactions in these fixed income instruments do not involve any commission or brokerage.

18. FINANCIAL INSTRUMENTS

(a) Classification of financial instruments

With effect from I January 2010, the Fund's financial assets and financial liabilities are measured on an ongoing basis at either fair value or at amortised cost based on their respective classifications. The significant accounting policies in Note 2 describe how the classes of financial instruments are measured, and how income and expenses, including fair value gains and losses, are recognised.

The following table analyses the financial assets and liabilities of the Fund in the statement of financial position as at 30 June 2011 by the class of financial instrument to which they are assigned, and therefore by the measurement basis.

	Financial assets at FVTPL RM	Loans and receivables RM	Financial liabilities at amortised cost RM	Total RM
Assets	IM I	1311	1411	1311
Unquoted investments	564,934,030	_	_	564,934,030
Deposits with financial	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,			,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,

Total financial liabilities			274,519	274,519
				expense, gains nd losses RM
Net gains and losses from Interest income, of which of		TPL		213,750

(b) Financial instruments that are carried at fair value

Interest income from loans and receivables

The Fund's financial assets at FVTPL are carried at fair value. The fair values of these financial assets were determined using prices in active markets for identical assets.

10.694.590

Unquoted debt securities

The indicative prices for RM-denominated unquoted debt securities are based on information provided by the index provider, International Index Company Limited via iBoxx.

The Fund uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair values are observable; either directly or indirectly;

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

The following table shows an analysis of financial instruments recorded at fair value by the level of the fair value hierarchy:

	30 June 2011				
	Level I RM	Level 2 RM	Level 3 RM		Total RM
Financial assets at FVTPL Unquoted fixed income					
securities		564,934,030		_	564,934,030

(c) Financial instruments that are not carried at fair value and whose carrying amounts are reasonable approximation of fair value

The following are classes of financial instruments that are not carried at fair value and whose carrying amounts are reasonable approximation of fair value due to their short period to maturity or short credit period:

- Deposits with financial institutions
- Sundry payables
- Amounts due to index provider
- Amounts due to Manager
- Amounts due to Trustee

There were no financial instruments which are not carried at fair values and whose carrying amounts are not reasonable approximation of their respective fair values.

RISK MANAGEMENT

The Fund is exposed to a variety of risks that included market risk, credit risk, liquidity risk, regulatory risk, management risk and stock risk.

Risk management is carried out by closely monitoring, measuring and mitigating the above said risk, careful selection of stocks for investment coupled with stringent compliance to investment restrictions as stipulated by the Securities Commission Act, Securities Commission's Guidelines on Exchange Traded Funds and the Deed as the backbone of risk management of the Fund

Market Risk

Market risk is the risk that the value of a portfolio would decrease due to changes in market risk factors such as equity prices, foreign exchange rates, interest rates and commodity prices.

Objectives and limitations of the Value at Risk ("VaR") methodology

The Fund model is Value-at-Risk based on Gaussian distribution to assess possible changes in the market value of the portfolio. Based on 180 weekly historical data points. the potential loss at the 99% confidence level is estimated. The VaR model is designed to measure market risk during normal market conditions. Due to the fact that VaR relies on historical data to provide information and that there is no prediction of the future change in the risk factors, the probability of large market movements may be underestimated. VaR may also be under- or over-estimated due to the interdependence between the market risk factors. Even though positions may change throughout the day, the VaR only represents the risk of the portfolio at the close of each business day. Analysis is carried out to estimate potential losses at the 99% confidence level.

In practice, the actual portfolio results will differ from the VaR calculation. In particular, the calculation does not provide a meaningful indication of losses under stressed market conditions.

(b) VaR assumptions

The VaR that the Fund measures is an estimate, using a confidence level of 99%, of the potential loss that is not expected to be exceeded if the current market risk positions were to be held unchanged for one day. The use of a 99% confidence level means that. within a one day horizon, losses exceeding the VaR figure should occur, on average under normal market conditions, not more than once every hundred days.

	Value-at-Risk (%)		
	Interest rate risk	Total VaR	
	RM	RM	
30 June 2011	0.54	0.54	
Average Daily	0.56	0.56	
Highest	0.60	0.60	
Lowest	0.53	0.53	

Based on the Gaussian VaR, using historical weekly data for the past 180 weeks, ABF Malaysia Bond Index that invests mainly in Ringgit denominated fixed income securities had a daily 1% Value-at-Risk (VaR) of approximately 0.54% as at 30 June 2011. This implies that not more than I out of 100 trading days would record a daily loss exceeding 0.54% of the NAV.

Credit Risk

Credit risk is the risk that the counterparty to a financial instrument will cause a financial loss for the Fund by failing to discharge an obligation. The Fund invests in fixed income securities and money market instruments. As such the Fund would be exposed to the risk of bond issuers and financial institutions defaulting on their repayment obligations which in turn would affect the net asset value of the Fund. This risk is mitigated by the Fund investing mostly in Government and quasi Government agencies bonds.

(a) Credit quality of financial assets

The following table analyses the Fund's portfolio of debt securities by rating category rated by rating agencies, i.e. RAM or MARC as at 30 June 2011:

Credit rating	RM	As a % of debt securities	As a % of net asset value
AAA	564,934,030	100.00	96.65

For deposit in financial institution, the Fund only makes placement with financial institutions with sound rating. The following table presents the Fund's portfolio of deposit by rating category as at 30 June 2011:

Credit rating	RM	As a % of debt securities	As a % of net asset value
PI/MARCI	19,635,568	100.00	3.36

(b) Credit risk concentration

Concentration of risk is monitored and managed based on sectorial distribution. The table below analyses the Fund's portfolio of debt securities analysed by sectorial distribution as at 30 June 2011:

Sector	RM	As a % of debt securities	As a % of net asset value
Government Supranational	554,767,189 10,166,841	98.20 1.80	94.91 1.74
	564,934,030	100.00	96.65

There is no geographical risk as the Fund invests only in Malaysia.

Liquidity Risk

Liquidity risk is defined as the risk of being unable to raise funds to meet payment obligations as they fall due. This is also the risk of the unit trust fund experiencing large redemptions, where the Investment Manager could be forced to sell large volumes of its holdings at unfavorable prices to meet redemption requirements.

The Fund maintains sufficient level of liquid assets, after consultation with the Trustee, to meet anticipated payments and cancellations of units by unitholders. Liquid assets comprise deposits with licensed financial institutions and other instruments, which are capable of being converted into cash between 5 to 7 days. The Fund's policy is to always maintain a prudent level of liquid assets so as to reduce liquidity risk.

Objectives and Assumptions

The coupons could be paid on annual, biannual or quarterly basis. Alongside with those bonds are zero coupon bonds that only pay the nominal amount at maturity date. Cash received from bonds are as calculation follows:

\$ = cash received R = annual coupon rate F = coupon frequency

- For zero coupon bonds, F = 0 At maturity: \$ = Nominal
- For F > 0 Before maturity: coupon payment, \$ = Nominal * (R/F)At maturity: maturity payment, \$ = Nominal + (Nominal * R/F)

The following table presents undiscounted contractual cash flows from different asset classes in the Fund:

Regulatory Risk

Any changes in national policies and regulations may have an effect on the capital market.

Management Risk

Poor management of the Fund may cause considerable losses to the Fund that in turn may affect the net asset value of the Fund.

Stock Risk

Stock risk is that specific to a stock and is not correlated with the specific risks of other stocks.

CAPITAL MANAGEMENT

The primary objective of the Fund's capital management is to ensure that it maximises unitholder's value by expending its fund size to benefit from economies of scale and achieving growth in net asset value from the performance of its investments. As disclosed in Note 10, the approved fund size by the Securities Commission is 1,000,000,000 units of which 537,421,800 units have been issued and a further 462,578,200 units can be issued in future period based on the daily net asset value per unit on the respective creation dates.

The Fund manages its capital structure and makes adjustments to it, in light of changes in economic conditions. To maintain or adjust the capital structure, the Fund may issue new or bonus units, adjust the distribution payment, or return capital to unitholder by way of redemption of units.

No changes were made in the objective, policies or processes during the period from 1 January 2011 to 30 June 2011 and 1 January 2010 to 30 June 2010.

tatement by the Manager

We, KOK TUCK CHEONG and DATIN MAZNAH MAHBOB, being two of the directors of the Manager, AmInvestment Services Berhad, for ABF MALAYSIA BOND INDEX FUND do hereby state that in the opinion of the Manager, the accompanying statement of financial position, statement of comprehensive income, statement of changes in net asset value and statement of cash flows are drawn up so as to give a true and fair view of the financial position of the Fund as at 30 June 2011 and the comprehensive income, the changes in net asset value and cash flows of the Fund for the half year ended on that date.

KOK TUCK CHEONG

Kuala Lumpur, Malaysia 29 July 2011

TRUSTEE'S REPORT

TO THE UNITHOLDERS OF ABF Malaysia Bond Index Fund

We have acted as Trustee of **ABF Malaysia Bond Index Fund** ("the Fund") for the financial period from 1 January 2011 to 30 June 2011. To the best of our knowledge, **AmInvestment Services Berhad** ("the Management Company"), has operated and managed the Fund in accordance with the following:-

- a) limitations imposed on the investment powers of the management company and the trustee under the Deed, the Securities Commission's Guidelines on Exchange-Traded Funds, the Capital Markets and Services Act 2007, and other applicable laws.
- b) valuation is carried out in accordance with the Deed and any regulatory requirements; and
- c) creation and redemption of units are carried out in accordance with the Deed and any regulatory requirements.

During this financial period, a total income distribution of 2.00 sen per unit (net) has been distributed to the unitholders of the Fund. We are of the view that the distribution is not inconsistent with the objectives of the Fund.
